

ABSTRACT

An optical fiber connector (3) includes an insert body (31), a door (33), a housing (35), an optical element (37) and a spacer (39). The door includes a shutter (331), a fixing portion (335) and a spring member (333) assembled onto the shutter. The door is held between the insert body and the housing. The shutter can bend inwardly into an inserting hole (351) defined by the housing when a fiber plug (5) is inserted the inserting hole.
